

FINALLY, A FREE HAND!

The **ONLY**
SINGLE-HANDED
UPPER
and lower eyelid
EVERSION TOOL

WHENEVER A CLINICAL TASK REQUIRES A FREE HAND

For meibographer imaging, Meivertor is the **ONLY** tool for your Paraoptometric staff.

UPGRADE YOUR PATIENT CARE

*"A comprehensive meibography assessment should always include **BOTH** upper and lower eyelids. Relying solely on lower eyelid imaging risks missing early gland changes that could guide timely intervention and improve patient care."*

– Paul Karpecki. Review of Optometry. March 2025. Things Are Looking Up.

OPTIMIZE YOUR INVESTMENT WITH MEIVERTOR

~	EFFICIENT Patient Flow	Technician images UPPER and lower meibomian glands upon intake – providing ECP with <u>complete</u> information
+	POSITIVE Patient Experience	Smooth eyelid eversion with Meivertor, leaves the patient relaxed and at ease.
+	ACTIVE Patient Engagement	Dry Eye and MGD are progressive and chronic diseases that require active patient understanding and engagement. TWO pictures are now worth TWO thousand words!
=	Patient RETENTION	Satisfied patients generate more revenue; and refer new patients to your practice.

EVERSION TOOL

WHENEVER A CLINICAL TASK REQUIRES A FREE HAND

Your practice is all about better patient flow, better patient experience, and better patient engagement. And THAT ultimately leads to better patient retention.

Meivertor is THE tool to do just that.

In fact, Meivertor is the **ONLY** single-handed UPPER and lower eyelid eversion tool available on the market today.

UPGRADE YOUR PATIENT CARE, AND USE MEIVERTOR FOR:

- Foreign Body Removal – identification of any embedded foreign body in the superior tarsal conjunctiva
- Contact lenses – identification of any contact lenses up under superior lid
- Giant Papillary Conjunctivitis – easier visualization
- Superior Lid Wiper Epitheliopathy – easy visualization
- Conjunctival concretions – visualization for removal

Once you use Meivertor you will want to have a Meivertor in every exam room.
