

# Anti-slip Nose Pads

Peel, Stick, and Replace on Eyewear Frames

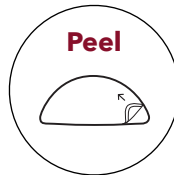

**STOP GLASSES FROM SLIDING & IMPROVE COMFORT**

**256% MORE GRIP ON WET AND OILY SKIN THAN OTHER NOSE PADS**

**Patented Gecko Grip Technology**

## Ideal for all eyeglass wearers, including patients:

- With larger frames that are slipping or uncomfortable
- Who sweat in hot weather or during activities
- That are active and cannot wear contact lenses
- With smart glasses or heavy lenses
- With a small or narrow nose bridge
- With thinning skin due to aging
- Who get deep red indent marks
- Who need progressive lens alignment

**Clear**  
For most frame colors

**Black**  
For black and tortoiseshell frames

## Perfect for full-frame Rx, sunglasses, smart glasses, readers, safety glasses, etc.

**No more slipping glasses**

**0.6mm Ultra-thin**

**16mm**

**7mm**

**Full Frames YES**

**Wire Frames NO**

Setex Nose Pads will not work equally well on every style and material of eyeglasses. The nose pads are designed for full plastic frames, they will not stick well to screw-in or push-in/click-in nose pads. They stick well to harder frames, they do not stick well to soft-touch frames.

Setex Nose Pads use a premium **3M** adhesive to maximize the bond lifetime to plastic eyeglasses frames while allowing residue-free removal. They are designed to be replaced as needed, commonly every few weeks to months depending on individual use case (one month is a safe average lifetime on everyday Rx frames).
